

CSA1505 - CLOUD COMPUTING AND BIG DATA ANALYTICS

Experiment-3

1. Create a simple cloud software application for Employee salary using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Buy, Rent, commercial, Rental Agreement , Rental Agreement, Area, place, Range, property value etc.

AIM:

To develop a simple Employee Salary Management System using Zoho Creator (Cloud Service Provider) to demonstrate the Software as a Service (SaaS) model. The application calculates the employee's gross salary and net salary based on salary components and deductions.

PROCEDURE:

Log in to Zoho Creator.

Create a new application named Employee Salary Management System.

Design a form with the following fields:

- Employee Name
- Employee ID
- Basic Salary
- Dearness Allowance (DA)
- House Rent Allowance (HRA)
- City Compensatory Allowance (CCA)
- Performance Compensation (PC)
- Tax
- Gross Salary
- Net Salary
- Last Update

Create workflows to:

- Calculate Gross Salary = Basic Salary + DA + HRA + CCA + PC.
- Calculate Net Salary = Gross Salary – Tax.
- Automatically update Last Update with the current date and time.

Save and publish the application.

Enter sample employee salary details.

Verify that the salary calculations and automatic updates are performed correctly.

INPUT:

The screenshot shows a web application interface for calculating employee salaries. The browser address bar displays the URL: `creatorapp.zoho.in/abdhyashree/environment/development/employee/#Form:emp_salary`. The application has a dark sidebar on the left with the following menu items: **employee**, **emp salary** (selected), and **emp salary Report**. The main content area, titled **emp salary**, contains a form with the following fields and values:

Field	Value
Name	john
emp id	101
salary	30,000
DA	3,000
HRA	5,000
CCA	1,000
PC	2,000
Tax	1,500
Gross Salary	41,000.00
Net Salary	39,500.00
Last Update	13-Jul-2026 14:51:15

The bottom of the sidebar shows a user profile for **Dhanya** with a notification icon.

OUTPUT:

employee

emp salary

emp salary

emp salary Report

emp salary Report

WORKFLOW:

RESULT:

A cloud-based Employee Salary Management System was successfully developed using Zoho Creator. The application stores employee salary details, automatically calculates gross salary and net salary, and updates the last modified date. This demonstrates the Software as a Service (SaaS) model using a cloud platform.
