

CSA1505 - CLOUD COMPUTING AND BIG DATA ANALYTICS

Experiment-6

Create a simple cloud software application for seat Booking System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

Input

The screenshot shows the 'Pick Your Seat' form in the compalint application. The form includes fields for Name (First Name: jana, Last Name: nayakan), Mobile Number (+91 9087826382), Email (jana@gmail.com), and Date (23-Jul-2026). Below these fields is a grid of 10 seat icons, with 10 seats selected. At the bottom of the form are 'Book Now' and 'Reset' buttons. The left sidebar shows the application menu with 'Pick Your Seat' and 'Booked Seats' options. The top bar indicates the application is in development mode and has a trial period of 5 days.

Output

The screenshot shows the 'Booked Seats' table in the compalint application. The table displays a list of booked seats with columns for Name, Seats, Email, and Mobile Number. The data is grouped by date, showing bookings for 20-Jul-2026, 21-Jul-2026, 23-Jul-2026, and 24-Jul-2026. The table shows 10 of 10 records.
