

CSA1505 - CLOUD COMPUTING AND BIG DATA ANALYTICS

Experiment-3

1. Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

AIM:

To develop a simple Car Booking Reservation System using Zoho Creator (Cloud Service Provider) to demonstrate the Software as a Service (SaaS) model. The application enables users to book cars by selecting travel details such as pickup location, destination, rental type, package, and duration.

PROCEDURE:

Log in to Zoho Creator.

Create a new application named Car Booking Reservation System.

Design a form with the following fields:

- Customer Name
- Mobile Number
- Email ID
- Search for Cabs
- From (Pickup Location)
- To (Destination)
- Trip Type (Rental / Outstation)
- Package Type
- Hours/Days
- Car Type
- Pickup Date & Time
- Fare
- Booking Date
- Booking Status

Configure drop-down lists for Trip Type, Package Type, and Car Type.

Create workflows to:

- Automatically set the Booking Date to the current date and time.
- Automatically set the Booking Status to Booked.

Save and publish the application.

Enter sample booking details and submit the form.

Verify that the booking information is stored correctly and the workflows execute successfully.

INPUT:

car

customer name: dhanu

mobile number: +91 675443768

Email: gt@gmail.com

from: madurai

to: chennai

booking time: out station

package type: 80km,12hrs

car type: sedan

number of days: 2

number of hrs: 24

pickup date: 28-Jul-2026

pickup time: HH:mm:ss

OUTPUT:

car Report

customer name	mobile number	Email	from	to	booking time	package type
dhanu	+9187698765	drfg@gmail.com	coimbatore	chennai	out station	40km,8hrs
gxyu	+91897765276	ga@gmail.com	chennai	madurai	rental	40km,8hrs

DESIGN:

WORKFLOW:

RESULT:

A cloud-based Car Booking Reservation System was successfully developed using Zoho Creator. The application allows users to search for cabs, choose rental or outstation trips, select packages, and reserve cars. The system automatically records the booking date and booking status, demonstrating the Software as a Service (SaaS) model using a cloud platform.
